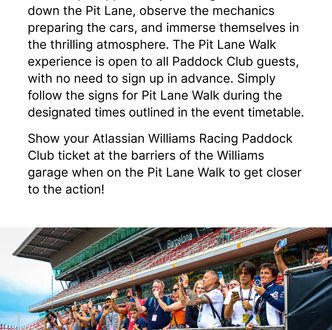
EVENT ACTIVITIES

CLUB LOUNGE

At each circuit, Formula 1 offers a Club Lounge area which all guests have access to.

This is a communal space offering a hub of entertainment and activity all weekend. With local performances, luxury food stalls, simulators, an F1 merch stall and other activations, this is a must-see for your Grand Prix weekend.

Located in the Club Lounge is the F1 Entertainment Desk – this is where you sign up for additional activities over the weekend such as the track tours, engineering hubs and photo safari excursion. All experiences remain subject to change and booking is subject to availability, organised by F1.



PIT LANE WALK

Paddock Club ticket holders are grated exclusive access to the Pit Lane at scheduled times throughout the weekend.

This unique opportunity allows guests to stroll down the Pit Lane, observe the mechanics preparing the cars, and immerse themselves in the thrilling atmosphere. The Pit Lane Walk experience is open to all Paddock Club guests, with no need to sign up in advance. Simply follow the signs for Pit Lane Walk during the designated times outlined in the event timetable.

Show your Atlassian Williams Racing Paddock Club ticket at the barriers of the Williams garage when on the Pit Lane Walk to get closer to the action!

TRACK TOURS

Guests are offered the opportunity to take a lap of the F1 circuit on the back of an open top truck, guided by former racing personnel through every twist, turn and fast paced straight.

Guests must sign up for the truck tours individually at the F1 Entertainment Desk where you will be issued an access sticker. Williams are not able to pre-book slots and would advise signing up as early as possible due to high demand and limited availability.

ENGINEERING HUB

The Engineering Hub fully unlocks the broadcast power of F1 taking you inside the very team that produces the broadcast for millions around the globe. Allowing insights into any driver in any team at any given point within the track sessions, the Engineering Hub is designed to be a tool allowing you to look at any aspects within the sport. Whether it is analysing pit stops, fastest laps, overtakes or spotting the latest Aero updates, the Engineering Hub has the capability to ‘pop the hood’ on anything captured within F1.

Please sign up to enjoy the Engineering Hub at the F1 Entertainment Desk, subject to availability.

PHOTO SAFARI

Photo safari is a thrilling experience enabling you to feel the raw speed of an F1 car closer than ever before. Guests are taken to a designated section of the track, right in the heart of the action at the barriers, enabling you to see and feel the cars as they endure the session in an experience like nothing else.

Please sign up to the Photo Safari excursion at the F1 Entertainment Desk, subject to availability. This experiences takes you to the track itself so please ensure you are prepared to vacate the Paddock Club promptly for your session.
